# ES Executive Summary

## ES.1 Introduction

The Montgomery, Alabama, region—which includes the City of Montgomery and parts of three surrounding counties—is a U.S. Census Bureau designated metropolitan planning area with an urbanized population of 263,907 according to the 2010 census. The urbanized population increased by 67,001 between 2000 and 2010, due to both population growth and the merging of the Montgomery Urbanized Area and the Prattville Urban Cluster.

The Long Range Transportation Plan (LRTP) is one of the key products of the planning process. The *Montgomery Study Area 2040 Long Range Transportation Plan* addresses the federal planning requirements that are the responsibility of the Metropolitan Planning Organization (MPO) as the organization authorized to carry out the transportation planning process. Specific LRTP requirements are itemized in Title 23 CFR Section 450.322. The LRTP must contain the following elements and perspectives:

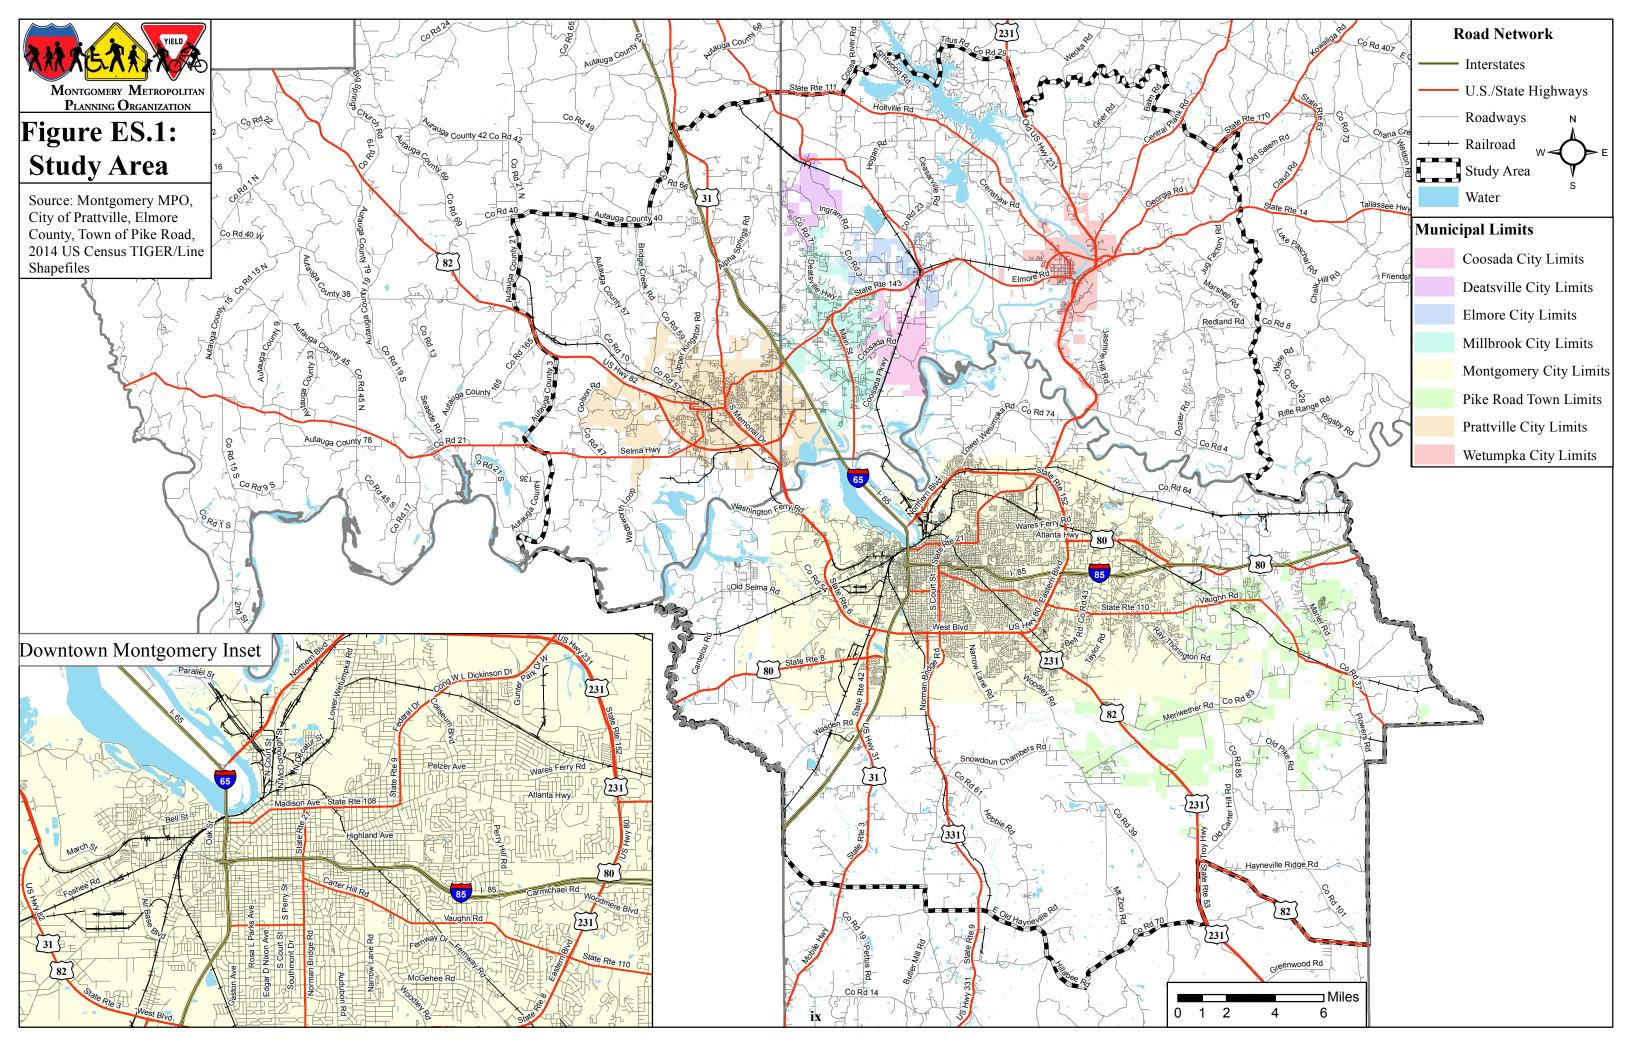

- Address a 20-year planning horizon
- Include long-range and short-range multimodal strategies that facilitate efficient movement of people and goods
- Be updated at least every five years
- Identify transportation demand over the plan horizon
- Include citizen and public official involvement and participation in the plan development process
- Consider local comprehensive and land use plans
- Include a financial plan

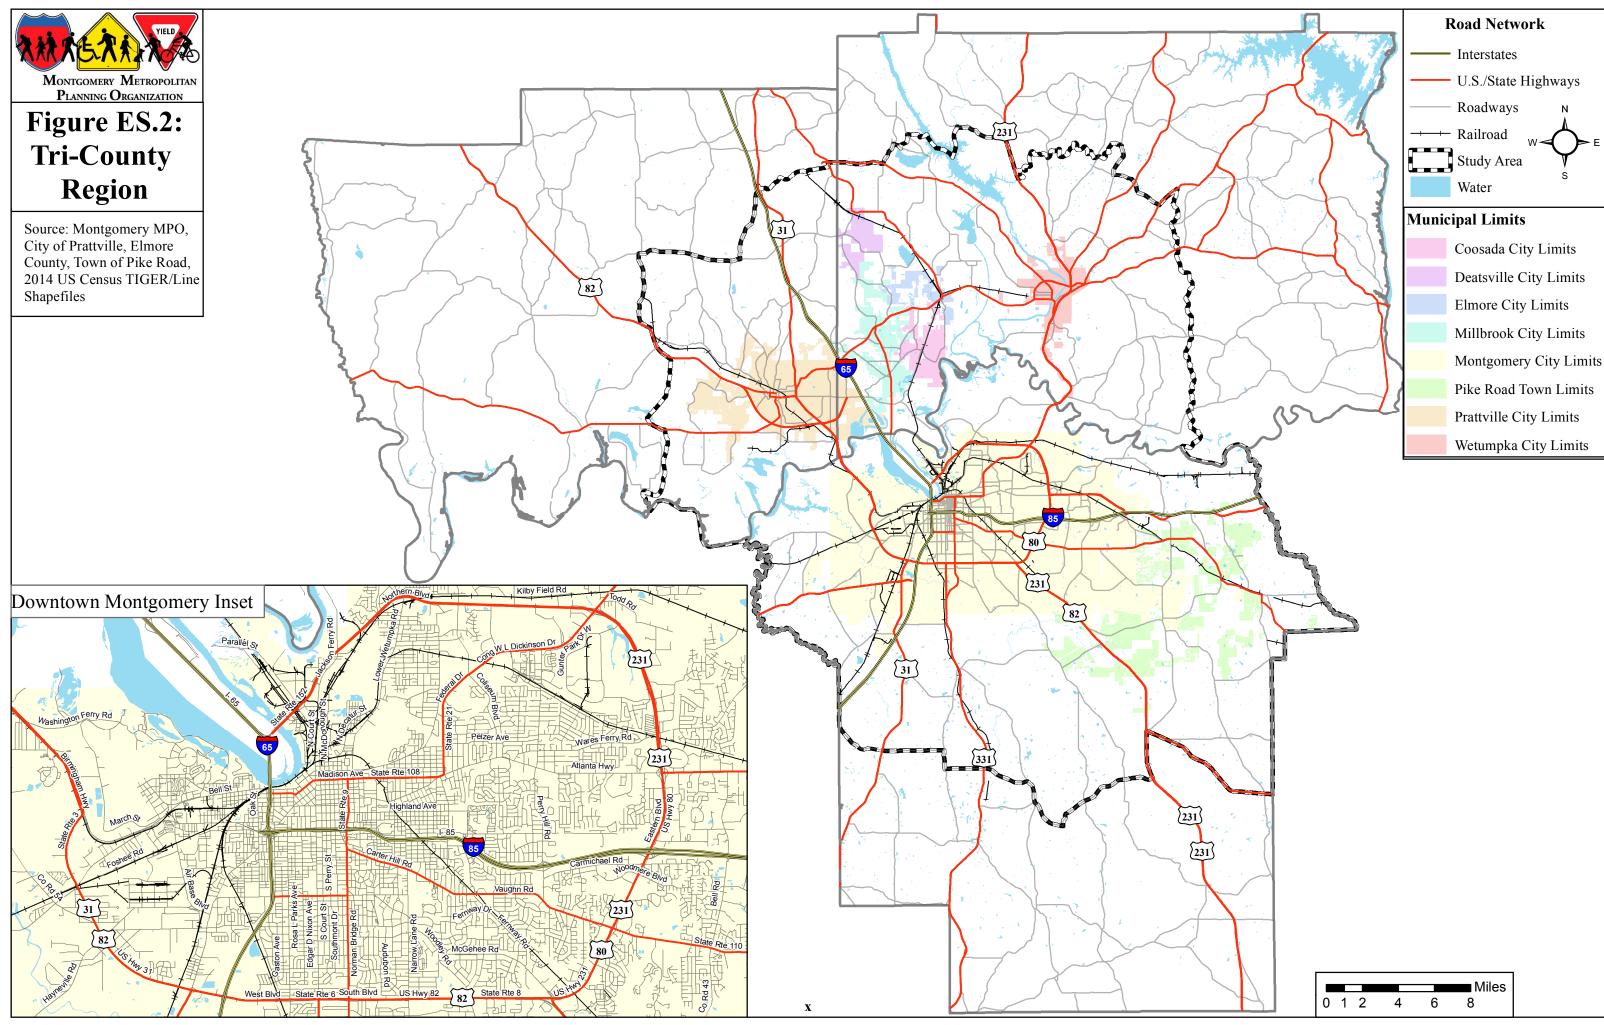

The previous *Montgomery Study Area 2035 Long Range Transportation Plan* was adopted by the Montgomery MPO in July 2010.

## ES.2 Study Area

The 2040 LRTP study area is the planning area defined by the Montgomery MPO. The study area's 950 square miles encompasses portions of Autauga, Elmore and Montgomery counties. In addition to the Montgomery urbanized area as defined by the U.S. Census Bureau (area within the City of Montgomery), the Wetumpka Urban Cluster in included in the study area. Incorporated jurisdictions within the MPO study area include Town of Coosada, Town of Deatsville, Town of Elmore, City of Millbrook, City of Montgomery, Town of Pike Road, and City of Prattville. Figures ES.1 and ES.2 detail the Montgomery MPO study rea. The Alabama and Tallapoosa rivers divide the study area and serve as boundary lines between Montgomery, Elmore and Autauga counties. Numerous bridge crossings unite the area, and Interstates 65 and 85 meet near the midpoint of the study area. The area has a rich history of human settlement, ranging from prehistoric Indians to the French occupation of Fort Toulouse to the development of the City of Montgomery as Alabama's State Capital.

## ES.3 LRTP Goals

The process of identifying transportation needs and prioritizing recommendations begins with a framework that defines the overall purpose of the Montgomery LRTP. LRTP recommendations are tied to projected federal, state and local funding sources for implementation. Therefore, the LRTP goals need to balance the policy priorities of the Federal Highway Administration (FHWA), Alabama Department of Transportation (ALDOT), and local jurisdictions. From a transportation perspective, this LRTP continues the local policy priorities adopted during the previous 2035 LRTP. Since adoption of the previous LRTP, federal and state policy level changes have included:

- The 2012 passage of MAP-21, which sets policy priorities for federal transportation funding. Developing performance measures to evaluate the overall success of MPO projects and policies is one of MAP-21's requirements.
- Issuance of ALDOT guidance to address Livability Principles and Measures. These were adopted by ALDOT per FHWA guidance to address sustainability in the MPO transportation planning process.

It should also be noted that the LRTP was developed in a manner to comply with all required Title VI and other Civil Rights regulations, provisions, and programs. The goals for the 2040 LRTP, along with the emphasis areas they are intended to address, are shown below in Table ES.1.

2040 LRTP Goals	Related Emphasis Area(s)
Optimize the efficiency, effectiveness, connectivity, safety, and security of the transportation system	<ul><li>Safety</li><li>Congestion Reduction</li><li>System Reliability</li></ul>
Promote state of good repair and prioritize maintenance needs Develop a financially feasible multimodal transportation system to support expansion of the regional economy	<ul> <li>Infrastructure Condition</li> <li>Freight Movement and Economic Vitality</li> <li>Reduce Project Delivery Delays</li> </ul>
Provide viable travel choices to improve accessibility and mobility, sustain environmental quality, and preserve community values	<ul> <li>Environmental Sustainability (Natural)</li> <li>Environmental Justice</li> </ul>
Coordinate the transportation system with existing and future land use and planned development	Project Coordination and Public Involvement
Increase jurisdictional coordination and citizen participation in the transportation planning process to enhance all regional travel opportunities	Project Coordination and Public Involvement
Develop, maintain, and preserve a balanced multimodal transportation system that provides for safe, integrated, and convenient movement of people and goods	<ul> <li>Multimodal Transportation</li> <li>Environmental Justice</li> </ul>

#### Table ES.1: LRTP Goals and Related Emphasis Areas

## ES.4 LRTP Work Program

The definition of a specific program of projects for the 2040 LRTP resulted from the long range transportation planning process. Identifying long range transportation system needs for horizon year 2040 required multi-faceted, integrated qualitative and quantitative analyses. The recommended projects provide multimodal solutions to address the area's future transportation needs. Because no one has a better understanding of the local needs than the area's residents and employers, efforts were undertaken to actively involve the public, local stakeholders, City, County and MPO staff, and other interested parties in the plan development process through meetings and public outreach efforts.

As required for LRTPs, the plan includes a financially constrained list of projects that represents the most critical projects able to be funded within projected funding amounts over the plan's 25-year horizon. Projects that have been identified as needed but cannot be funded through available sources are considered visionary, or needs, projects. For planning purposes, ALDOT groups improvements into two distinct categories – roadway capacity and maintenance and operations (MO) projects. MO projects include intersection and operational improvements, railroad crossing improvements, bridge replacement or repair, resurfacing, bicycle and pedestrian improvements, and transit operations. The work program will require funding from federal, state and local sources. The many improvements along federal and state highways will be reliant on federal funds for implementation.

### **ES.4.1** Fiscally Constrained Projects

The fiscally constrained work program includes 17 capacity improvements at an estimated cost of \$108.4 million, as shown in Figure ES.3 and Table ES.2. There are 78 MO projects at an estimated cost of \$191.2 million in the fiscally constrained LRTP work program. The full list of fiscally constrained and committed MO projects is provided in Table ES.2.

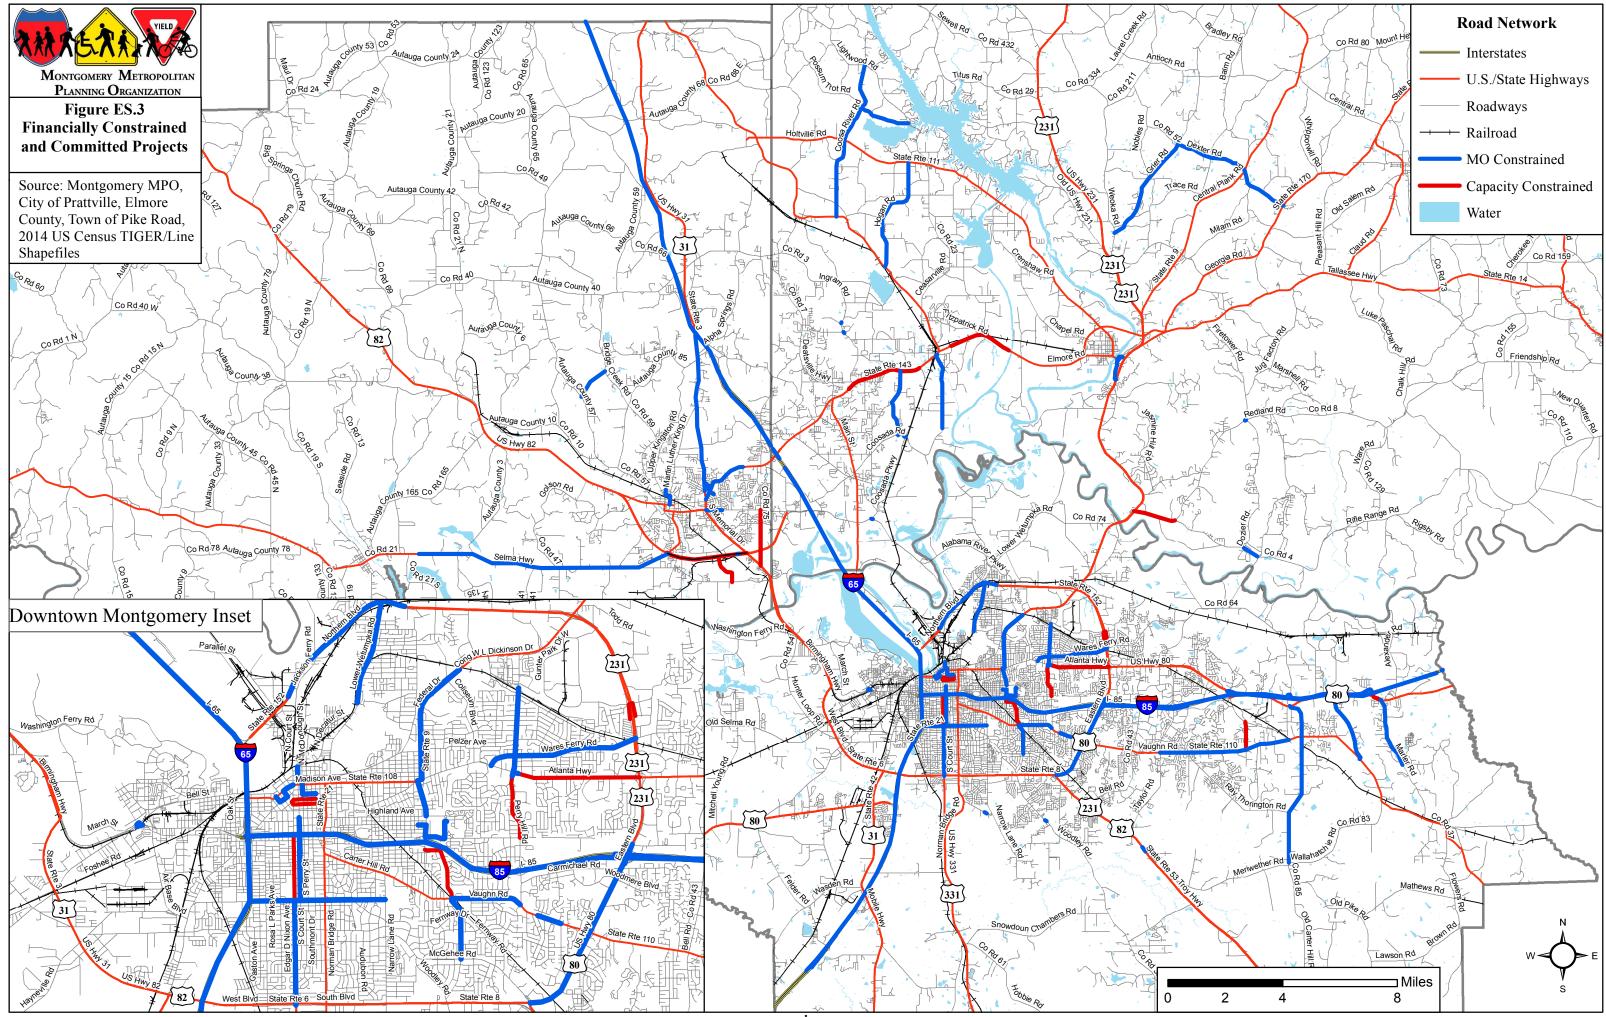

Roadway	Location	Capacity/Maintenance & Operations
Redland Rd	US 231 to Riflerange Rd	Capacity

Lower Wetumpka Rd	Tolvert St to Nothern Blvd	Maintenance & Operations
Hunter Loop Rd	US-80 to Birmingham Hwy	Maintenance & Operations
Day St	Bridge replacement	Maintenance & Operations
Day St	Maxwell AFB	Maintenance & Operations

#### ES.4.2 Visionary/Needs Projects

The needs assessment resulted in the identification of another 25 capacity improvement projects for which funding is not projected to be available. The cost for these capacity improvements totals an estimated \$535.3 million. Many of these projects were included in the 2035 LRTP but were shifted in priority due to funding shortfalls and/or changes in travel characteristics. Similarly, there are 58 MO improvements for which funding is not projected to be available. The cost for these MO improvements is estimated at \$158.8 million. Of these, 56 projects costing approximately \$152.8 million are for improvements within the City of Montgomery. Most of these projects are for resurfacing and operational improvements. A complete list of visionary/needs improvement projects is provided in Table ES.3.

### ES.4.3 Montgomery Outer Loop Projects

The Montgomery MPO has been working with ALDOT to develop the Montgomery Outer Loop, a set of roadway improvements and/or new roadways to facilitate mobility and accommodate development on the outskirts of the Montgomery metropolitan area. Of the improvements associated with the Outer Loop, only a lighting project (at an estimated cost of \$4.7 million) is included in the fiscally constrained LRTP work program. The remainder of these improvements, totaling approximately \$544.2 million, is projected to be constructed by 2039 or beyond. A complete set of the Outer Loop projects, including projected costs and completion dates, is provided in Table ES.4.

Improvement	Completion	Estimated
	Dates	Costs
New Roadway from SR 6 (US 231) to CR 85 (Carters Hill	2039-2049	\$80,478,638
Road)		
New Roadway from CR 85 (Carters Hill Road) to SR 110	2039-2059	\$131,057,932
Lighting from south of SR 110 to south of I-85	2019	\$4,719,972
Widening SR 108 from I-65 to west of SR 9 (US 331),	2039-2044	\$58,768,596
including an interchange at SR 3 (US 31)		
Widening SR 108 from SR 8 (US 80) to west of CR 103	2039-2042	\$37,051,980
(Felder Road), including an interchange at SR 8 (US 80)		
Widening SR 108 from west of CR 103 (Felder Road) to I-65,	2039	\$57,451,243
including an interchange at CR 103 (Felder Road)		
Widening SR 108 from west of CR 39 (Woodley Road) to SR	2039-2041	\$42,531,799
6 (US 231), including an interchange at CR 39 (Woodley		
Road)		
Widening SR 108 from west of SR 9 (US 331) to west of CR	2039	\$97,440,909
39 (Woodley Road), including an interchange at SR 9 (US		
331)		
SR 108 interchange, ramps and bridges at I-65	2039-2043	\$39,446,500

### ES.4.4 Freight Related Improvements

While there is no specific work program dedicated to freight improvements, the facilitation of freight mobility was a major consideration during the identification and prioritization of LRTP improvements given its importance in securing a stable economic environment for the Montgomery region. The following improvements are among those in the fiscally constrained work program that will serve to enhance freight mobility throughout the region:

- Capacity improvements along US 82 from SR 14 to US 31 in Prattville
- Capacity improvements on South Industrial Boulevard from US 82 to Autauga CR 4
- Capacity improvements on Atlanta Highway from Perry Hill Road to East Boulevard (US 231)
- Resurfacing and bridge replacement projects along various segments of I-65
- Intersection improvements on SR 8 (US 231, Eastern Boulevard) at the I-85 interchange

### ES.4.5 Bicycle and Pedestrian Improvements

A number of existing and planned pedestrian and bicycle facilities are located in the Montgomery study area. The two strategies for constructing bicycle and pedestrian facilities are either concurrently with planned roadway improvements or as stand-alone projects utilizing the Montgomery MPO allocation of TAP funds. The Montgomery MPO is projected to receive a total of approximately \$10.4 million, or \$415,413 annually, in federal funding through the year 2040. Projects will be prioritized annually based upon the applications received and a project's relative merit.

#### **ES.4.6** Public Transportation

The Montgomery MPO is projected to receive a total of approximately \$108.2 million, or \$4,329,202 annually, of federal funding through the year 2040. The Montgomery Area Transit system has several visionary improvements over the next 25 years, which will be done as funding becomes available via competitive grants or by the City of Montgomery general fund. Tables ES.5 and ES.6 identify transit funds and projects, respectively.

	Annual	Allocations			
	Montgomery Area Transit System	Autauga County Rural Transit	Total		
Operations	\$3,164,632	\$500,000	\$3,664,632
